

Queens Meadow

Client:

One North
East and
Hartlepool
Borough
Council

Value:

£2,560,000

Brief

To construct a traffic light-controlled access from the A689 dual carriageway into a new business park and associated internal road network.

This included extensive traffic-management and contraflow systems.

A storm water, 4,500mm x 1,400mm precast concrete culvert, with associated drainage, was installed.

Action

Initial earthworks were carried out to relocate previously placed screen mounds.

About 800m of single carriageway road and a roundabout were constructed, along with infrastructure drainage and street lighting.

Overhead and underground service diversions and new service installation works, to a value of more than £300,00, were completed.

The existing A689 dual carriageway was realigned and a new, traffic light-controlled junction into the business park constructed.
