

Transporter Bridge Paving Works

Client:
Stockton-on-Tees
Borough Council

Engineer:
Arup

Value:
£230k

Brief

To undertake environmental improvements to the existing public highway located at Port Clarence Road, A178, adjacent to the Transporter Bridge on the North bank of the River Tees at Stockton.

Action

The works consisted of the removal of and re-construction of the existing hard paving including the creation of a new at grade bus lay-by and residential parking areas.

In addition an improved drainage system was installed together with associated street furniture and soft landscaping.

Works were undertaken in 'live' traffic conditions and included close liaison with the local residents to minimise disruption.

Works were carried out under the ECC Form of Contract Option B
